

WM CARES RESEARCH SHOWCASE

Tuesday 14th October 2025

Birmingham Hospice-Selly Park

This event showcases the amazing research and quality improvement work happening in the West Midlands.

It is a great chance to network within our research community, learn what is happening in the region and how we can best improve care for our patients.

To register, please email: westmidlandcares@gmail.com

Places are limited so we recommend registering your interest early!

We will also shortly be inviting anyone with their own research, quality improvement work and other projects in supportive and palliative care to submit brief abstracts – to be considered for a short oral or poster presentation on the day.
